

CLAIMS

9. **(New)** The foot inclination angle measuring method as set forth in claim 1, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
10. **(New)** The shoe or shoe sock liner selecting method as set forth in claim 2, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
11. **(New)** The shoe or shoe sock liner manufacturing method as set forth in claim 5, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
12. **(New)** The foot inclination angle measuring system as set forth in claim 8, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
